

Estate in Sevilla

THE HOUSE

This totally private estate is located between Seville and Carmona, - 15 km from each city - and is next to the Vega de Carmona.

The house was built by the family in 1939 and since then it has been constantly renewed to incorporate and adapt to present-day comforts, while maintaining all the traditional features and aesthetics that give it its Andalusian flavour and personality. It covers 1400 m2, and is conveniently distributed: two large living rooms, a dining room, several courtyards, verandas, patios, and a swimming pool; eight bedrooms with en-suite bathrooms; and not forgetting the garden, which was designed by the prestigious landscape designer Nicolau Rubio i Tàduri, and the entire estate reflect the elegance of Andalusia. It also has a chapel in the house where pilgrimages used to take place at one time.

The estate began its life as a farmhouse, and still retains most of the original structure and buildings of that time. Currently, the estate is engaged in horse breeding as the family has close ties to the world of horses and has one of the most important collections of antique horse carriages in the world. These can be seen and enjoyed on the estate, at the April Fair or at special events. These factors make this private house an ideal place to organize corporate events, company meetings, training courses or team building activities for all those companies looking for a " one of a kind ", " exclusive " and " private " place.
