

GREENHOUSE SPACE

In the cosmopolita district of Chueca and Alonso Martínez is this unique space. Located in the large central courtyard of a stately building from the beginning of the 19th century, it is believed to have been built by the Marquis of Casa Jimenez.

The Greenhouse maintains its original structure of iron, greyish and marked French air. Today turned into an ephemeral space, it has two heights and 76 square meters in total.

The central patio gives it a special character, from where we can contemplate with perspective the magnificent building, the shelter of its two large chestnut trees that increase even more its charm.

Between the patio and the greenhouse there is a maximum capacity of 179 people.

In both spaces can be organized events, cocktails, presentations, "pop-up" stores, filming ... that undoubtedly bring originality by its uniqueness. Almost unimaginable to be able to find such a place in the center of Madrid.
